

Mozzam Inamdar

Software Developer

📞 7021825970  Github ✉ mozzam607@gmail.com  LinkedIn

PROFILE

Software Developer specializing in scalable backend systems, microservices, and AI-powered applications using Python, FastAPI, Django, and cloud-native technologies. Currently focused on AI Agents, Retrieval-Augmented Generation (RAG) systems, LLM applications, and agentic workflows.

WORK EXPERIENCE

Software Developer

Oct 2025 – Present

Quantiphi

- Developing production-grade AI agent systems using LangChain, LangGraph, LangSmith, RAG pipelines, and MCP-based integrations.
- Building multi-agent orchestration workflows with contextual memory, tool execution, and stateful workflow management.
- Creating scalable and asynchronous FastAPI-based backend services for production LLM applications.
- Implementing agent tracing, evaluation, and observability pipelines for workflow monitoring and optimization.

Software Developer

Apr 2024 – Oct 2025

Tubelight Communications Pvt Ltd.

- Built scalable AI-enabled backend systems using FastAPI, Django, Docker, and Node.js following microservices architecture.
- Developed REST and GraphQL APIs with Kafka and WebSocket-based real-time communication.
- Improved deployment efficiency by 40% using Docker and GitHub Actions CI/CD pipelines.

Software Developer

Jul 2022 – Apr 2024

Finrise Softech Pvt Ltd.

- Developed REST and GraphQL integrations improving API performance by 25%.
- Designed microservices for real-time trading systems improving delivery efficiency by 30%.
- Automated financial data ingestion pipelines from Zerodha, Binance, and Bloomberg APIs.

SKILLS

Languages and Frameworks – Python, JavaScript, Node.js, Django, FastAPI, Flask

AI/ML & NLP – Scikit-learn, NLTK, LangChain, LangGraph, RAG, Context Engineering

Databases & Vector Stores – PostgreSQL, MySQL, MongoDB, Redis, FAISS, ChromaDB

Data Streaming & Messaging – Kafka, WebSocket, REST, GraphQL

Cloud & DevOps – AWS, Azure, Kubernetes, Docker

PROJECTS

RMS (Risk Management System)

Finrise Softech Pvt Ltd.

- Built a real-time risk analysis platform for trading operations using Express.js, MongoDB, Redis, and WebSockets.
- Improved transaction throughput by 50% through query optimization and async processing.

QA Tool (Quality Analysis Tool)

Tubelight Communications Pvt Ltd.

- Developed a conversational QA analysis tool using FastAPI and NLP techniques.
- Improved sentiment analysis accuracy and implemented speaker diarization for agent scoring.

CERTIFICATIONS

- | | | |
|---|---|---|
| • Graph Developer
(Associate) - Apollo ↗ | • AWS Cloud Practitioner -
Amazon Web Services ↗ | • Azure Fundamentals (AZ-
900) - Microsoft ↗ |
| • Google Data Analytics -
Coursera ↗ | • AWS Cloud Quest: Cloud
Practitioner ↗ | |

EDUCATION

Bachelors of Science in Information Technology (Mumbai)

M V Mandali's College of Commerce and Science
